

“The supply of pre-owned devices by Ryzex has delivered us significant savings and there has been absolutely no compromise on quality.”

Nigel Passmore, Warehouse IT Manager, Carphone Warehouse

Many companies looking to introduce or update their mobile technology automatically look at expensive new hardware options and are then put off by the thought of having to find and then justify the need for a large capital outlay. At Ryzex, we are able to offer you a lower cost alternative - pre-owned equipment.

PRE-OWNED: A LOWER COST ALTERNATIVE FROM RYZEX

Each year, Ryzex repairs up to 20,000 hand held devices in its state of the art UK based repair centre. By extending the life of hand-held technology, Ryzex can offer you a cheaper yet high quality alternative to new technology. The price may be less but there will be no compromise on quality.

SO WHAT DOES PRE-OWNED MEAN?

Ryzex’s pre-owned process is a multi-step chain of inspection, testing and restoration that ensures that our refurbished barcode equipment performs as well as – or better – than new. Our overall warranty return rate has been less than half the average recognised industry return rate for new equipment. Moreover, we back every pre-owned product with a 90-day warranty to give you peace of mind.

INDUSTRY LEADING HARDWARE

FULLY MANAGED SERVICE

Rather than buying just the hardware, Ryzex can provide a fully managed maintenance and support programme so you can use your devices straight from the box and continue to concentrate on your core business without having to worry about the technology. The fully managed service can include:

- **Device staging & configuration** - Ryzex ensures that your equipment is ready for use right from day one with no need for your own teams to worry about device set up. Additionally, if you require further units or replacements, Ryzex will ensure that any new devices are set up to the same specification.
- **Remote device management** - Using over-the-air mobile device management software, Ryzex can monitor and maintain your hardware in the field enabling remote trouble shooting, application updates and minimising downtime.
- **Protection plus** - Benefit from Ryzex's Advanced Emergency Exchange offering, a best in class next day replacement service, to ensure that the impact to your operation is minimised when devices fail. In addition, the Ryzex repair portal allows you to log repair jobs, track their status and view your complete repair history 24/7.
- **Option to add power management** - Battery health check and management services to ensure your devices are performing at optimal levels.
- **Ongoing support** - Help desk facilities, go live support, applications hosting and software training are also available.
